

Frederick Thomas
ELECTRICAL & MAINTENANCE LTD

RETAIL

SCREWFIX

Frederick Thomas Electrical & Maintenance Ltd were commissioned by Screwfix plc, to assess their existing estate and create a blueprint design to rollout throughout their expansion programme. The emphasis on this being energy reduction, improved control, standardisation, reduced maintenance and speed of installation. Commercial considerations (costs) also being a major factor to ensure this programme is delivered in the most cost effective and productive manner.

We produced mechanical and electrical specifications with generic design drawings. On the back of this, we have been fortunate to fulfil the roll of Screwfix's services consultants, and to install the majority of the new build and refurbishment projects throughout the UK.

To assist the approval process we produced a generic quantified schedule of rates agreed with the client/professional team. The specification is regularly updated to ensure the product and installation is best suited for its application.

The result of our design, proposals and installations have yielded energy savings in their stores of 60-70% in addition to adhering to green/eco Client aspirations.

Frederick Thomas

ELECTRICAL & MAINTENANCE LTD

SCREWFIX

The Installation included:

- Lighting
- Small Power
- Switchgear Enhancement
- Full Containment
- Data Wiring
- Fire Alarms
- Security & Ancillary Services
- Mechanical Wiring

Client: SCREWFIX
