

Frederick Thomas
ELECTRICAL & MAINTENANCE LTD

RETAIL

TRADEPOINT BEDFORD

Frederick Thomas Electrical & Maintenance Ltd was appointed by HB Projects Limited as a partnering M&E services contractor to design and install electrical services for the first drive thru TradePoint store in the UK (Bedford).

The total M&E services works was completed within a 6 week programme and to budget.

This project, being the inaugural large format TradePoint store in the UK, had a number of new concepts introduced. A drive thru facility, public café, planning pods, paint mixing bays and selection displays. The project is now their model large format store. The client intends to undertake a roll out of these stores, to the design and installation, that we were commissioned to develop.
