ELECTRICAL & MAINTENANCE LTD

RETAIL

McDonald's Balham

Frederick Thomas Electrical & Maintenance Ltd was appointed by Galamast Limited, as a partnering M&E services contractor, to design and install electrical services for McDonald's at Balham.

The project involved the complete closure of this busy restaurant. A five week programme was set to carry out a main intake panel replacement and reposition, new distribution boards and a total rewire of all four floor levels contained in the building, including the fire alarm system.

During this period FTE&M were working alongside the principal contractors team that were carrying out demolition works, floor laying, building, decorating and the installation of the new kitchen facilities.

The electrical installation was completed on time, within budget and was deemed to have exceeded the client's expectations for a project of this size and complexity

Frederick Thomas

ELECTRICAL & MAINTENANCE LTD

McDonald's Balham

The installation included:

- Electrical services
- Small Power
- Switchgear
- Full Containment
- Fire Alarms
- Lighting
